BOWL CLEAN BIO

A liquid cleaner designed to remove hard water scale and urinary scale from vacuum toilet systems

Effectively removes hard water scale and urinary scale from vacuum toilet system lines, lavatory holding tanks and components. With Bowlclean Bio as a remedial cleaning agent, more frequent use will restore the inside diameter dimensions narrowed by scale accumulation.

Directions for use

Bowlclean Bio can be added to the vacuum toilet system by using a dosing system. It also can be applied directly to scale deposits in toilet bowl for spot removal. The general dosing rate in this case is 0.3 ltr per toilet bowl per week. When the results are satisfactory after a period of 4 months, the product can be dosed every second week.

Properties.

Specific gravity (20°C)	: 1.05
pH (20°C)	: < 3.0
Flash point	: none

For detailed information on safety and health, please refer to Material Safety Data Sheet and / or Product label

Star Marine is a specialist chemical manufacturer and any directions for the use and application of its chemicals are provided in good faith. This information is based on experience and research but is not intended to be a definitive statement for the use of the chemical or to be taken as complete process advice. While the company, its management and employees will share what knowledge they have and make recommendations, this information can never give rise to liability or consequential damage from third parties. Any information provided regarding the chemical does not exempt the customer from examining the product and its directions for use to determine the suitability themselves for its intended purpose.
